Full-stack developer skilled in the MERN stack and Python, with hands-on experience building and deploying responsive, production-ready web apps integrated with REST APIs and JWT authentication. National-level hackathon finalist (IBM Expert Labs) — proven ability to build functional prototypes under time pressure. Seeking a full-stack/frontend developer role.

SKILLS

- **Frontend:** HTML, CSS, Bootstrap, JavaScript, React.js, Responsive UI
- **Backend:** Node.js, Express.js, Python, REST APIs
- **Databases:** MongoDB, SQLite
- **Tools & Services:** Git, GitHub, Postman, VS Code, Power BI, Netlify, Vercel, JWT Auth, Supabase, Cloudinary

HACKATHONS & PROGRAMS

IBM Expert Labs National Hackathon — Finalist

Aug 2025

Represented Sambhram Institute of Technology (1 of 10 selected campus-wide)

- Selected as 1 of 10 students from college for a nationwide hackathon; advanced to the final round, one of only 50–80 teams selected across all participating colleges in India.
- Built a GenAI-powered full-stack prototype (React.js, Node.js, Express.js) within a 24–48 hr timeline as part of a 4-member team, contributing to MVP design, API integration, and final presentation to IBM judges.

PROJECTS

AI Resume Analyzer (ATS Score Checker)

ai-resume-analyzer-ruddy-ten.vercel.app

- Built a full-stack MERN app with secure JWT-based user authentication (register/login) and protected routes for resume upload and analysis.
- Implemented PDF resume parsing (pdfjs-dist) to extract text and an ATS scoring engine that compares resume keywords against job description keywords.
- Integrated Google Gemini AI to generate detailed suggestions, identify missing skills, and improve resume bullet points.
- Deployed full-stack app with backend on Render and frontend on Vercel.
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Auth, pdfjs-dist, Gemini AI API*

Nxt Trendz — E-Commerce Web App

nxtbyrajesh.ccbp.tech

- Built a full-featured e-commerce clone with React.js: JWT-based authentication, protected routes, and client-side token management via cookies/local storage.
- Multi-page UI flow (login, product listing, detail, cart, checkout) with reusable components and route-level access control.
- *Tech Stack: React.js, JavaScript, HTML, CSS, Bootstrap, JWT Auth, Node.js, Express.js*

Wikipedia Search App

wikiappbyrajesh.ccbp.tech

- Built a search interface consuming the Wikipedia REST API via async JavaScript (fetch), with dynamic rendering of results and a fully responsive layout.
- *Tech Stack: HTML, CSS, JavaScript, REST API*
